SUBJECT: ARGENTINA EAGER TO PARTICIPATE IN U.S. GLOBAL
SCIENCE PARTNERSHIPS PROGRAM

REF: STATE 174678

11. (U) This cable is sensitive but unclassified, and not for
Internet distribution.

Summary

12. (SBU) Argentine officials responded enthusiastically to
Science and Technology Adviser to the Secretary of State Dr.
George Atkinson's proposed Global Science Partnerships
program (GSP21) during Atkinson's visit to Buenos Aires
November 7-9. Minister of Education, Science and Technology
Daniel Filmus described Argentina's participation as
potentially "very important," and the GOA's Secretary of
Science and Technology said Argentina was willing to support
the program financially. Embassy Buenos Aires suggests
harnessing the momentum generated by Atkinson's visit by
having the Department quickly select Argentina as a potential
GSP21 partner and initiate more formal partnership
discussions. End Summary.

GOA on Board

13. (U) Science and Technology Adviser to the Secretary of
State Dr. George Atkinson traveled to Argentina November 7-9
as part of the Global Dialogues on Science and Technology
framework of meetings (see septel for detailed report of
visit). Argentina was the third stop on a four-country tour
through South America (Peru, Chile, and Brazil were the
others) designed to allow Atkinson and his delegation of nine
to determine whether suitable candidates for the Department's
proposed GSP21 program exist in the region.

14. (SBU) GOA officials responded enthusiastically to
Atkinson's description of the GSP21 program. Minister of
Education, Science and Technology Filmus told Dr. Atkinson
and Ambassador Wayne that science and technology are among
President Nestor Kirchner's top priorities, and that
Argentina has traditionally had the region's highest levels
of S&T attainment. Filmus outlined the GOA's plans to spur
an increase in the number of Argentine scientists, and said
the GSP21 program could be a "very important" part of those
plans. Science and Technology Secretary Tulio Del Bono had
earlier offered a similar assessment, even giving Dr.
Atkinson a commitment that the GOA would be willing to

financially support GSP21. Both officials took pains to point out Argentina's suitability as a GSP21 partner, and indicated that they might have some modest resources available.

Comment

15. (SBU) Argentina has a relatively strong scientific tradition, and the Kirchner government has taken important steps to promote S&T education and research. We also already enjoy an excellent working-level scientific exchange, and Argentina is one of only four countries in the region with which the U.S. has signed an umbrella science and technology cooperation agreement. Those conditions, coupled with the GOA's marked enthusiasm for GSP21, make Argentina a natural candidate for the program. We therefore encourage the Department to select Argentina as a potential GSP21 partner and to initiate more formal partnership discussions. That decision should be taken quickly if the momentum from Dr. Atkinson's visit is not to be lost.

16. (U) Dr. Atkinson did not clear this telegram before leaving Buenos Aires.
